

□ SOUND OF A GODDESS

Frigga

DAP

Two bass reflex ports improve the output of the column speaker's lowest octave.

The angled speaker connector prevents unsightly cables from protruding from the back of the column speakers, providing protection against accidental disconnection and allowing for neat cable management.

The long speaker pole passes through the spacer and into the column speaker's top hat for secure positioning on the subwoofer.

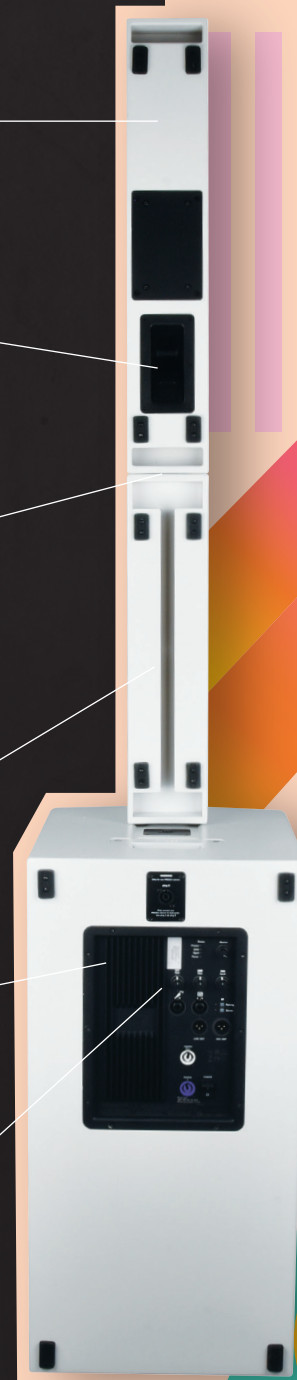

The cable channel in the spacer allows for neat cable management between the column speaker and the subwoofer. And rubber feet on the bottom and back of the speakers protect against dirt, dents and scratches.

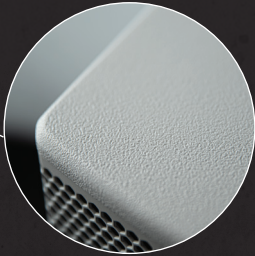

The built-in 2-channel amplifier has a clean interface and uses convection cooling for quiet and reliable operation.

Separate controls allow you to create a well-balanced sound, and status LEDs show the amplifier's status at a glance.

The durable polyurea coating gives the Frigga a stylish and professional look, while protecting the speakers from scratches.

The speaker front grill is made from 1.5 mm thick steel mesh with a stylish honeycomb pattern and is powder coated in matching colours.

The subwoofer has a mounting hole with an M20 thread that securely holds each mounting pole, providing stability for the narrow column in all configurations.

The three ergonomic handles on the subwoofer, two on the sides and one on the top, ensure easy handling. They are finished in matching colours to enhance the elegant appearance.

A 4-pole speaker output connector on the top of the subwoofer allows for tidy cable management.

Accessoires

Included accessories:

- 1x four-core speaker cable
- 1x power cord
- 1x short mounting pole
- 1x long mounting pole

Optional Accessories:

- Transport cover for Frigga subwoofer
- Transport cover for Frigga column speaker, spacer, poles and cables

Specifications

Power Amplifier Peak Output	2000 W
Subwoofer Power	500 W RMS
Top Cabinet Low Driver Power	250 W RMS
Top Cabinet High Driver Power	250 W RMS
Max. SPL Subwoofer at 1 m	132 dB
Max. SPL Column Speaker at 1 m	134 dB
Frequency Response	40 - 20,000 Hz
Satellite Dispersion Angle (Horizontal)	110 degrees
Satellite Dispersion Angle (Vertical)	30 degrees
Subwoofer Dispersion Angle (Horizontal)	360 degrees
Subwoofer Dispersion Angle (Vertical)	180 degrees

To ensure optimum coverage in a variety of environments, two set-ups can be realised with the two mounting poles: a short column and a tall column. The spacer provides an elegant look, while concealing the mounting pole and speaker cable.
